About CanaSea Gold Inc.

CanaSea Gold Inc. is a specialized institution that explores and mines gold through **AI+MOG™ (Mining, Oil & Gas)** technology. Currently, it holds exploration rights (the "**Exploration Rights**") for 10 blocks of gold and other minerals in **Saskatchewan, Canada**, covering a total area of approximately 300 square kilometers.

At the same time, relying on **AI+MOG™** exploration technology and EPC resource management at the mining end, the company is actively cooperating with operating mines in countries and regions outside Canada (such as **Madagascar**) through the **Farm-In/Out** model, and is obtaining gold revenue through a service trade model.

In the next 10 years, the company is striving to become a respected enterprise in the global field of AI technology for gold exploration and gold mining, both within the industry and in society.

CanaSea Gold Inc. is an entity under the CanaSea Group, and "CanaSea" is a registered trademark held by Mr. FANG, the founder of the group.

CanaSea Corp is a federally registered institution in Canada, established in **2003.** The company specializes in oilfield development and operations, as well as investments in new technologies and applications within the minerals, oil, and gas (MOG) sector.

In 2019, CanaSea Corp launched its **AI+MOG™** Division, dedicated to leveraging cutting-edge technologies, including artificial intelligence, to create proprietary technology systems and process workflows specifically for the MOG exploration field, driving transformative advancements.
