VOOMBU

CAPABILITY STATEMENT · HORIZON EUROPE 2027

Climate and ESG risk, expressed in euros, for SMEs, cities and investors

Voombu is a Madrid-based SaaS platform (TRL 8-9), live with clients and pilots in Spain, that helps SMEs, mid-sized organisations and the public bodies that support them measure, manage and report ESG and enterprise risk in financial terms. We join Horizon Europe consortia as a technology and SME-engagement partner.

1 · WHAT THE PLATFORM DOES

RISK MAP IN EUROS

COSO ERM map across eight categories; each risk scored from inherent to residual and translated into expected annual loss in euros.

ESG SCORE

Industry-calibrated score comparable across sectors and sizes, suitable for portfolio views: a city's business fabric, a cluster, a bank.

FOOTPRINT & REPORTING

Scope 1-3 carbon footprint; VSME, CSRD, SFDR and GRI reporting with traceable evidence for every data point.

VERIFIER PORTAL & AI

Portal used by certification bodies to review and attest reports; AI assistant pre-fills questionnaires from existing documents.

2 · WHAT WE BRING TO A CONSORTIUM

Contribution	What it means in a project
Working platform, TRL 8-9	Collect, score and report ESG, climate and resilience data from SMEs, local business ecosystems and supply chains; ready to pilot at city or regional scale.
Quantification method	Prioritise adaptation and mitigation measures by euros of risk avoided, for cities and for the businesses in their territory.
SME engagement	Design and delivery of hands-on workshops where each company works its own case in the tool; run with EDIH Madrid Region and EEN Madrid.
Pilots with real SMEs	Network of associations, consultancies and public innovation hubs in Spain; replicable with partners in other countries.
Exploitation after funding	A commercial platform already in the market keeps project outputs alive once the grant ends.

3 · CALLS WE ARE TARGETING (2027)

HORIZON-MISS-2027-07-CLIMA-CIT-NEB-01 Joint call Climate-Neutral and Smart Cities Mission and Adaptation Mission: climate risk and adaptation data for cities and their local businesses.

New European Bauhaus REGEN-04 (sustainable and circular construction sector), PARTICIPATION-01 (co-governance of neighbourhood green transitions), BUSINESS-02 (community investment models).

Cluster 2 TRANSFO-03 (sustainable competitiveness and the social economy) and HERITAGE-03 (pathways to a circular economy).

4 · WHO WE WOULD LIKE TO MEET

Coordinators of Cities Mission, Adaptation or NEB proposals who need an SME engagement, data collection and monitoring component.

Municipalities, regional agencies and Twin Cities with a climate action or neighbourhood plan that involves local businesses.

Research organisations on climate risk, urban resilience or sustainable finance who want to pilot and validate methods with real SMEs.

Clusters, associations and chambers that can bring SMEs into a pilot.

Role sought: partner (technology and SME-engagement work packages). **Team:** corporate finance, enterprise risk management, ESG consulting and software engineering. **Languages:** Spanish, English. **Available** for bilateral meetings on 21 January 2027 in Istanbul and for online follow-ups through b2match afterwards.
