8peaks

From research ambition to deployed AI.

We engineer the software, safeguards and integration that turn innovation into pilot-ready systems.

AI PLATFORMS | AGENT SECURITY | PILOT DELIVERY

HORIZON EUROPE • DIGITAL EUROPE • COLLABORATIVE R&I

A delivery partner inside the consortium.

We connect research, software engineering and real-world validation.

01

CO-DESIGN

Translate objectives into architecture, interfaces and test criteria.

›

02

BUILD

Develop AI workflows, secure services and integration components.

›

03

INTEGRATE

Connect partner technologies and deploy to pilot environments.

›

04

VALIDATE

Test with users, document evidence and refine the solution.

From proposal writing and technical planning to integrated releases and exploitable results.

Three products. One connected stack.

Reusable capabilities that can be tailored to project objectives and partner systems.

DISCOVER

SIFT8

Process intelligence

Identify bottlenecks, recurring work and opportunities to improve operations.

ORCHESTRATE

KENNISAI

Sovereign AI workflows

Connect models, data, tools and human review in controlled AI processes.

GOVERN

AGENTWATCH

AI agent security

Manage tool access, monitor agent activity and support traceable operations.

INSIGHT → GOVERNED WORKFLOWS → REVIEWABLE OUTCOMES

Clear tasks. Tangible deliverables.

Indicative scopes, shaped around the call, consortium and pilot requirements.

AI PLATFORM ENGINEERING

Agent workflows · model & data integration · RAG

Architecture + integrated software release

TRUST & AI SECURITY

Tool-access policies · runtime monitoring · audit

Security controls + test evidence

INTEGRATION & PILOTS

Partner APIs · private deployments · testbeds

Demonstrator + deployment documentation

EXPLOITATION & UPTAKE

Foreground IP · reuse strategy · partner adoption

Exploitation input + adoption roadmap

Roles may include technical task leadership, system integration and contribution to work-package results.

Focused on the calls where technology matters.

Example themes for EU collaborative research and innovation.

1

HUMAN-CENTRIC AI

Human-supervised agents that support people at work.

Governed agent demonstrator

2

SOVEREIGN DATA & AI

AI orchestration across private and federated environments.

Secure workflow prototype

3

TRUSTWORTHY AI

Controlled agent behaviour, traceability and auditability.

Policy and validation package

4

INDUSTRY & OPERATIONS

Process insight connected to targeted automation.

Operational pilot with KPIs

8peaks

Turn project ambition into a working demonstrator.
