Available for Regional & International Projects / Clusters Collaboration

EXECUTIVE PROFILE

Bilingual healthcare management professional combining a clinical university degree in Health Sciences with ongoing Master of Business Administration (MBA) training at the School of Economics, National University of Córdoba (FCE-UNC). Specialized in bridging clinical workflows with strategic operations, Standard Operating Procedure (SOP) design, continuous process improvement, and digital healthcare adoption. Proven ability to coordinate multidisciplinary teams, align cross-functional healthcare stakeholders, and utilize data analytics (Power BI, Advanced Excel) to optimize efficiency, regulatory compliance, and quality of care.

CORE EXPERTISE

- **Healthcare Operations & Workflows:** Clinical process mapping, Lean Healthcare methodologies, procedural standardization, and healthcare service optimization.
- **HealthTech & Digital Health:** Technology adoption, clinical systems onboarding, Electronic Health Records (EHR/EMR), and AI-driven clinical workflow integration.
- **Compliance & Medical Protocols:** Deep knowledge of biosafety regulations, surgical protocols, healthcare quality standards, and healthcare documentation audit.
- **Data-Driven Management:** KPI tracking, data modeling, reporting dashboards in Power BI and Advanced Excel for operational decision-making.
- **Cross-Functional Leadership:** Mentoring and coordinating multidisciplinary cohorts, strategic stakeholder management, and institutional relations.
- **Languages:** Spanish (Native) | English (C1 Advanced / Professional Fluency) | Italian (Intermediate).

PROFESSIONAL EXPERIENCE

Healthcare Operations & Clinical Support Lead
Specialized Healthcare Practice | Córdoba, Argentina
January 2023 – Present

- Led operational logistics, case scheduling, and clinical protocol adherence across complex outpatient surgical procedures, ensuring 100% compliance with safety and sterility standards.
- Spearheaded the integration of digital diagnostic tools and health platforms, reducing administrative onboarding and clinical documentation time by 30%.
- Designed and implemented Standard Operating Procedures (SOPs) for inventory control of critical biomedical supplies, eliminating stockouts and material waste.
- Built operational tracking matrices and dashboards in Excel and Power BI to evaluate patient flow, treatment acceptance rates, and operational bottlenecks.

- Served as the operational liaison between healthcare professionals, technical suppliers, and administrative staff to ensure seamless clinical operations.

Clinical Instructor & Academic Program Coordinator
Faculty of Health Sciences – Catholic University of Córdoba (UCC) | *Córdoba, Argentina*
March 2023 – December 2025

- Supervised clinical training, procedural techniques, and day-to-day operations for multidisciplinary cohorts of 40+ healthcare professionals and students per academic period.
- Conducted practical simulations and technical evaluations, enforcing rigorous adherence to biosafety protocols and institutional guidelines.
- Coordinated resource allocation, material supply, and logistical readiness across university clinical practice modules.
- Designed standardized evaluation frameworks that improved procedural accuracy and student performance metrics.

Clinical Operations Associate
Multidisciplinary Healthcare Center | *Córdoba, Argentina*
January 2021 – February 2023

- Managed patient admission workflows, provider coverage verification, and clinical record compliance.
- Audited healthcare documentation and care pathways, reducing billing discrepancies and ensuring regulatory compliance.
