FROM EVENT TO FATE.

CARPET RECYCLING YOU CAN PROVE.

Recycling should not end with a collection receipt.

At Blu Sky Technical Services, we take event carpet waste and transform it into recovered polymer, while VeriPur LoopTrace creates the evidence trail behind every batch.

From the moment carpet leaves your event, its journey can be recorded through processing to its final outcome, giving venues, organisers and sustainability teams greater visibility over what happens next.

YOUR EVENT. YOUR CARPET. YOUR EVIDENCE.

Every verified batch can support a clear chain of custody, certificate and carbon report, helping organisations demonstrate their circularity commitments with evidence rather than assumptions.

VERIFIED
Evidence you can defend.

TRACEABLE
Event to fate, batch by batch.

DEFENSIBLE
Certificates & carbon reports you can trust.

VERIPUR LOOPTRACE RECORDS:

EVENT + VENUE
1
Where the material originated.

BATCH ID
2
Traceability from uplift through intake.

PROCESSING + QA
3
Documented processing and quality controls.

RECOVERED OUTPUT
4
Material grade, yield and downstream destination.

RESIDUE
5
Reconciled and recorded against the batch.

CARBON REPORTING
6
Baseline route compared against the actual recycling pathway.

AUDIT-READY. CERTIFIED. IMPACTFUL.

VeriPur LoopTrace connects every stage of the journey with verifiable data and a carbon report, so you can prove your impact with confidence.

CHAIN OF CUSTODY
