RESEARCH & INDUSTRY PARTNERSHIP OPPORTUNITY

Livestock microbiome and One Health

Bringing scientific microbiome research closer to the needs of livestock production.

OFFICIAL 2027 TOPIC

HORIZON-CL6-2027-02-FARM2FORK-03

RESEARCH AND INNOVATION ACTION (RIA) | EUR 5-6 million EXPECTED EU CONTRIBUTION / PROJECT

Opens 20 April 2027 | Deadline 23 September 2027

GREENAGRO | POTENTIAL INDUSTRIAL PARTNER

Greenagro is a North Macedonian SME active in animal nutrition, commercial probiotic products and applied agricultural education. We can offer an industry-facing perspective to consortium research linking microbiome interventions with animal health, welfare, antimicrobial stewardship and environmental outcomes.

COLLABORATION CONTRIBUTION

- **Applied intervention design**
  Help shape practical probiotic and microbial intervention concepts, with protocols defined by research partners.
- **Farm-relevant evaluation**
  Contribute feed and production context, trial feasibility and meaningful performance and welfare indicators.
- **Knowledge transfer**
  Help turn validated findings into farmer guidance, outreach and training through our Educational Centre.

PARTNERS WE SEEK

- **Microbiome and veterinary science**
  Metagenomics, microbial ecology, veterinary clinical research and animal nutrition.
- **One Health and AMR expertise**
  Epidemiology, animal-environment interactions, risk modelling and antimicrobial monitoring.
- **Research and farm networks**
  Livestock study sites, interoperable data platforms and an experienced Horizon RIA coordinator.

PROPOSED ROLE IN THE CONSORTIUM

Potential industrial beneficiary: feed-sector expertise, intervention feasibility, stakeholder engagement, dissemination and uptake; scientific testing led by qualified partners.

Evidence-led validation - One Health integration - Livestock uptake

Let us explore a consortium together.
