RESEARCH & INDUSTRY PARTNERSHIP OPPORTUNITY

Scaling microbiome solutions for sustainable food systems

Reliable production, in-situ validation and viable routes to the EU market.

OFFICIAL 2027 TOPIC

HORIZON-CL6-2027-02-FARM2FORK-07

INNOVATION ACTION (IA) | EUR 7-8 million EXPECTED EU CONTRIBUTION / PROJECT

Opens 20 April 2027 | Deadline 23 September 2027

GREENAGRO | POTENTIAL INDUSTRIAL PARTNER

Greenagro brings commercial experience in livestock nutrition, probiotic applications and practical farmer adoption. We are interested in wider food-systems partnerships that combine microbiome science, reliable production, field validation and commercial deployment; animal nutrition could be one relevant use case.

COLLABORATION CONTRIBUTION

- **Production and product fit**
  Explore reproducibility, formulation, quality control and real-world delivery requirements with technical partners.
- **In-situ implementation**
  Co-design industry-relevant testing and user feedback in a wider food-systems validation programme.
- **Market access and uptake**
  Contribute business-model feedback, user needs, distribution insights and skills transfer.

PARTNERS WE SEEK

- **Microbiome innovators**
  SMEs, start-ups and research groups developing market-relevant microbiome solutions.
- **Scale-up and regulatory experts**
  Bioprocess and quality specialists, standards experts and EU market-access advisers.
- **Multi-actor food-system partners**
  Agri-food businesses, test sites, consumer/public actors and an experienced IA coordinator.

PROPOSED ROLE IN THE CONSORTIUM

Potential industrial beneficiary: animal-nutrition use case, market-facing specification, user uptake and business-model work - within a broad, multi-actor food-systems proposal.

Reproducible scale-up - EU market readiness - Multi-actor adoption

Let us explore a consortium together.
